HIGH QUALITY MEDICAL TRANSCRIPTION

Populate EMRs Automatically, Using Dictation

Emdat's DaRT™ (Discrete Accurate Reportable Transcription) offers medical facilities an electronic medical record (EMR) implementation approach that minimizes operational change and completely eliminates physician productivity loss.

Physicians continue to dictate

Emdat's DaRT tags transcription content (Eg. Chief Complaint, Medical History, Family History, etc.) and discretely populates your EMR automatically, as if the clinician had entered it themselves.

With DaRT, hospitals and clinics can embrace the future of healthcare without requiring change in clinician behavior, while still meeting "meaningful use" guidelines. Clinicians can spend their valuable time doing what they do best: practicing medicine.

We deliver superb functionality and client satisfaction by providing streamlined workflow and EMR integration, all with no contracts, no capital investment and rapid deployment. Contact us to learn more.
